SUMMARY

Fresh graduate in Software Engineering from Telkom University Surabaya. I build responsive, clean web applications using React.js, Next.js, and Laravel. Recently completed my degree and open to Frontend and Full-Stack Developer opportunities. Proficient in building responsive, scalable web applications, with hands-on experience delivered through internship and production projects. Passionate about clean code, pixel-perfect UI, and delivering user-friendly digital solutions.

TECH STACK

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Backend & Database:** Laravel, PHP, MySQL, PostgreSQL, Supabase, REST API
- **Tools:** Git, Figma, Chart.js, Discord Webhook, VS Code, PHPSpreadsheet
- **Additional:** C#, Unity, Godot Engine (WebGL/HTML5 Export)

EXPERIENCE

Software Development Intern — Telkom University Surabaya, HR Dept *Sep 2025 – Jan 2026*

Surabaya, Indonesia

Tech: Laravel, MySQL, Chart.js, Tailwind CSS, Bootstrap, PHPSpreadsheet

- **Problem:** HR team managed employee performance data manually via spreadsheets, causing frequent delays and data inconsistencies.
- **Role & Action:** Sole developer; built an end-to-end HRIS Dashboard with Trained vs Untrained status tracking and Chart.js Bar & Radar visualizations.
- **Result:** Cut report generation time by 60% and reduced manual data entry effort by 80% per HR cycle.

PROJECTS

Disbox Web — Discord-integrated file storage app built with React.js, Supabase, and Tailwind CSS | disbox-web.pages.dev

- **Problem:** Needed a personal file storage solution with no monthly cost; paid cloud storage options were not viable for a solo project.
- **Role & Action:** Sole developer; architected a Discord Webhook-backed file storage web app with Supabase Auth for user management and a real-time upload pipeline.
- **Result:** Eliminated hosting costs entirely to \$0/month and delivered a production-ready app accessible on PC and mobile browsers.

Ruang Santri — Islamic boarding school management system built with Laravel, Blade, and MySQL | ruang-santri.com

- **Problem:** Islamic boarding school managed student records and attendance manually with no digital system.
- **Role & Action:** Refactored entire frontend codebase; restructured into modular Blade components, separated API calls into service files, and optimized image assets for all device breakpoints.
- **Result:** Improved page load speed significantly and raised Lighthouse performance score to 90+ after full refactor.

HRIS Dashboard — HR performance monitoring dashboard built with Laravel, Chart.js, and MySQL

- **Problem:** HR department had no visual system to monitor employee performance and training status, relying entirely on manual spreadsheets.
- **Role & Action:** Responsible for dashboarding and employee performance features; built interactive Bar & Radar Chart visualizations using Chart.js and implemented Trained vs Untrained status tracking.
- **Result:** Delivered a fully functional performance monitoring dashboard, cutting report generation time by 60% and reducing manual data entry by 80% per HR cycle.

EDUCATION

Bachelor of Engineering in Software Engineering — Telkom University Surabaya *Sep 2022 – Jul 2026 (Graduated)*

Surabaya, Indonesia | GPA: 3.71 / 4.00

- **Relevant Coursework:** Object-Oriented Programming, Database Management, Web Development, Game Development.
